International Domain Portal

Domain Name Management:

The Safenames International Domain Portal (IDP) provides clients with centralised and consolidated management of domain names. The IDP system allows users to register all available gTLD and ccTLD domain names and manage any pre-existing domains in their portfolio through one system, making domain maintenance simple.

With the facility to enable you to create sub-accounts and separate clients, the IDP system is malleable and easily tailored to accommodate different offices, geographical regions, or reseller accounts. The additional option of layered passwords under a master account, grants clients customised IDP domain Portfolios.

IDP Facilities:

- Domain name ordering in over 240 countries.
- Online status information (access to your registered domain's status, their renewal dates, any recent orders and their status).
- Dedicated Personal Account Manager (whose role will be to provide personal assistance and support where necessary).
- Online Whois information (view the Whois information for any registered domain name in the World);
- Online Accounts system (where you can view, download or print out all financial transactions made from your IDP account).
- Transfer Processing (Safenames can manage any domain names you have with different registrars. Add the domain to the IDP and we can process your transfer request).
- Renewal Notification (Safenames will notify you of your domain's expiry providing ample opportunity to renew the domain name).
- Specific Country Rules & Regulations (you can access individual country's criteria to determine registration requirements, rules and regulations).
- Additional Clients (the IDP allows you to add additional clients under your main account allowing additional users to manage or view the domains).
- Local Contact Service (Safenames can provide you with local contacts to ensure that you can register the domain that you want).
- Company Formation (in countries which require a company based in that country Safenames can provide a Company Formation Service guaranteeing your domain name).
- Your Whois Privacy (Safenames Whois privacy protection service - protecting your personal details from being displayed on Whois databases).
- BigYobi (Safenames' domain name and trademark protection service. When used in conjunction with the IDP, can provide comprehensive online Brand protection).

Additional Facilities for IDP Clients:

- Corporate accounts
- Personal Account Manager
- Reseller Program
- Corporate Protection Plan
- Local Contact Services
- Company Formation Services
- Advanced DNS Service
- 24 hour Support
- Multiple Billing
- Weekly domain Newsletters
- Consultations

- “Domain Name and Trade Mark Protection Services”とあるので、商標権保護ビジネス
- ドメイン名販売促進パンフレットよりは多いが、それほど多くはない

BigYobi

Domain Name and Trade Mark Protection Services

The newest development from Safenames, the BigYobi system provides comprehensive assistance in online brand protection. BigYobi has a multitude of facilities to assist users in the isolation and prevention of online trademark infringement. It identifies domain names and trademarks that incorporate your brand name and any potential infringements of your intellectual property.

Global Combined Search

This tool enables users to search every domain extension for any domain names containing your brand or trademark. The Global Combined Search tool provides users with:

- A summary of the total number of domain names registered across the globe;
- Registrant names and WHOIS information concerning the domain names incorporating your trademarks;
- Information concerning the relevant Parking Companies the “infringing domains” are held with;
- IP address information;
- Page titles and meta-tag data;
- Screen capture of the content of any of the domain names which incorporate your brand; and
- The option to save data directly to a workspace of your choice.

Bulk Domain Checker

The Bulk Domain Checker allows users to check large portfolios of their domain registrations against any registered trademarks, companies or domain disputes of similar domain names.

Trademark Searches

Users can search global trademark databases for trademark information including USPTO, Canada, WIPO, OHIM, German and UK Trademark databases with full access to trademark information and images.

Reverse WHOIS

Ascertain whether a person, company or address has other domain names that correspond to registered trademarks. Enables users to identify potential third-party portfolios of infringing domain names.

Brand Watch

This service allows users to be notified via email of any newly registered or deleted domain names that are identical, contain, misspell or are phonetically similar to your trademark or brand names.

Domain Watch

The Domain Watch facility allows users to enter specific domain names and monitor any changes in registration or ownership status. With colour coded updated sections you are able to identify exactly what changes the domain has undergone and when these changes occurred.

Domain Dispute Search

Clients can utilise the Domain Dispute Search to search former reported domain disputes on a person or company, or identify case law for the formulation of a formal complaint. The database includes all WIPO, National Arbitration Forum (NAF) and Nominet cases and also has the facility to search cases by the trademarks cited in the case.

Workspaces

This facility is an area where the user can store any specific information pertaining to a domain name displayed in a search result. This could be for the creation of a special report or to collate follow up information. With the ability to name workspaces, this tool will assist in your management of reports and results.

- .berlin .paris なども同様の普及活動を展開中

ICANN会場で配られているパンフレット(5)

.gal の2, 3ページ目(見開き)

PuntoGal has adopted this slogan from the USA elections campaign, not because we like one candidate better than the other one, but because "Yes, we can" has become a global, fashionable cutting-edge catchphrase, just like the Internet, ICANN and the community supporting **PuntoGal**.

The race is on. We know that launching new gTLDs application rounds is a complicated process, requiring dedication and hard work. **PuntoGal** has been attending ICANN's most important meetings for two years and we are aware of the difficulties ICANN has to overcome with fair-minded rigor and rationality.

But we would also like to raise your awareness of our haste: our community is eagerly awaiting the launch of dotGAL, which is why we courteously ask you to hurry and run this race together to achieve for all a democratic, participatory, integrated and global Internet.

We are ready, and waiting for the process to begin. We sincerely hope that these initiatives in which we have both labored over the past years won't be penalized with another delay on the opening of the process nor with a higher gTLD evaluation fee.

We know it's a great challenge for ICANN and, on behalf of the **PuntoGal** Association, we assure you "Yes, we can" and so we ask you, please "Yes, ICANN?"

Galician speakers are now spread all over the world with 4.3 million people inhabiting over 40 countries still maintaining strong links with a common culture.

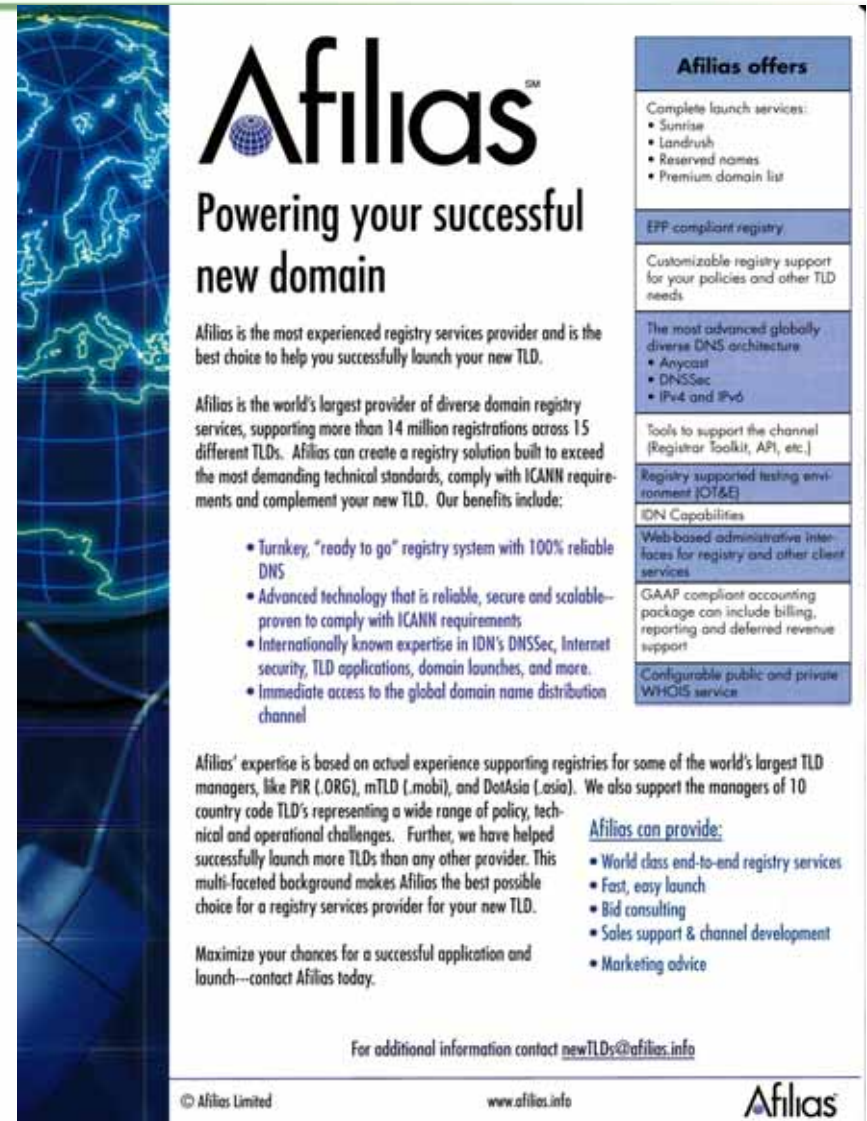

Throughout this time our cultural contact and communication has been sustained by a series of networks, from letter mail to telephone, and now the Internet. If Internet had not existed, we would have had to invent it. Therefore, to maintain our unity and preserve our cultural identity, we are dedicated to promoting the .gal domain.

GALICIAN SPEAKERS AROUND THE WORLD

EUROPE (3.5 million speakers) Spain, Switzerland, France, Germany, United Kingdom, Portugal...	AMERICA (600,000 speakers) Argentina, Venezuela, Brazil, Cuba, Mexico, Uruguay, USA, Panama, Chile...	OCEANIA (75,000 speakers) Australia and New Zealand ASIA (75,000 speakers) Mainly China and Japan AFRICA (50,000 speakers) Mainly Namibia and South Africa

AfiliasSM
Powering your successful new domain

Afilias is the most experienced registry services provider and is the best choice to help you successfully launch your new TLD.

Afilias is the world's largest provider of diverse domain registry services, supporting more than 14 million registrations across 15 different TLDs. Afilias can create a registry solution built to exceed the most demanding technical standards, comply with ICANN requirements and complement your new TLD. Our benefits include:

- Turnkey, “ready to go” registry system with 100% reliable DNS
- Advanced technology that is reliable, secure and scalable—proven to comply with ICANN requirements
- Internationally known expertise in IDN's DNSSec, Internet security, TLD applications, domain launches, and more.
- Immediate access to the global domain name distribution channel

Afilias' expertise is based on actual experience supporting registries for some of the world's largest TLD managers, like PIR (.ORG), mTLD (.mobi), and DotAsia (.asia). We also support the managers of 10 country code TLD's representing a wide range of policy, technical and operational challenges. Further, we have helped successfully launch more TLDs than any other provider. This multi-faceted background makes Afilias the best possible choice for a registry services provider for your new TLD.

Maximize your chances for a successful application and launch—contact Afilias today.

Afilias™

Why You Need Your Own Top Level Domain

The Internet Corporation for Assigned Names and Numbers (ICANN) will soon begin accepting applications from organizations and members of the public who wish to claim their own top-level domain (TLD). Here is why you should consider applying for your own TLD:

- To reinforce and protect your corporate or product brand(s)
- To own short, memorable Internet real estate directly relevant to you or your business/organization
- To capitalize early on the NEW process which allows everyone to apply

To be successful, you should have an experienced partner by your side—a partner who knows how to apply for and manage new domains. Afilias has helped more TLDs to be approved and launched than any other provider—we already support over 14 million registrations across 15 TLDs.

“If you have a great idea and the business and financial resources to be successful, Afilias can help you successfully bid for and launch your own TLD.”

Afilias can handle all of the technical aspects of managing your TLD, from the registry system to DNS support. Our systems are known for reliability, security and scalability. In addition, our experience and partnership approach will include help with the application as well as downstream activities such as registrar relations and reporting. If you have questions, contact us today.

Frequently Asked Questions

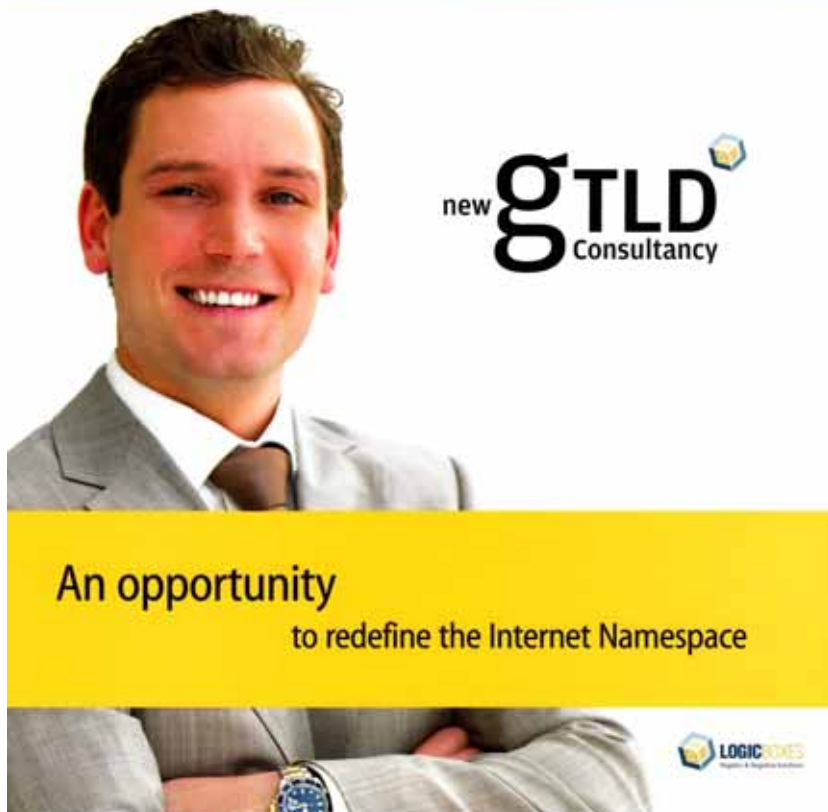

Q. Why get your own TLD?
A. As the Internet evolves, organizations must communicate with their audiences in more direct and personal ways. Applications such as social networking, niche content sites, and streaming media have created some of the most exciting new innovations in the last few years. What's next? New applications and developments can be fuelled by a unique TLD, whether it is .cause, .corporate, .fun, .city, or .topic. How about .YOU!

Q. Who can apply for a TLD?
A. Anyone can apply for a new TLD. Whether you head a major corporation, a non-profit or are just an entrepreneur with a great idea, the process is the same. Although the RFP has not been finalized by ICANN, it is anticipated to be released for public comment soon. Shortly thereafter, ICANN will begin accepting applications, so NOW is the time to get started.

Q. Where do I start? Who can help me?
A. Afilias is the most experienced and successful provider of domain name registry services in the industry. We are familiar with ICANN's processes and already support 15 different TLDs. Afilias is ready to speak with you about your plans today.

new **gTLD**
Consultancy

An opportunity
to redefine the Internet Namespace

A Golden Opportunity

On 26th June 2008, The ICANN board approved a recommendation to implement the largest expansion in gTLDs. The new policy allows any organization with the technical competence and financial means, to apply for and operate a generic top-level domain (gTLD) of its own choice.

“ This opportunity holds tremendous potential for a large variety of entities including Registries, Registrars, Brand Owners, Communities and Web Service Corporations. ”

- この類は多い

Web Services Corporations (Registries, Registrars, Hosters etc.)

- Create new mainstream gTLD to compete with the incumbents. The tid can either be open to all users (like .shop) or restricted to a specific niche (eg.sport)
- Provide a tid specific online service (eg .blog, .mail)

Large Brand Owners

- Boost online Brand Image
- Create myriad segments of websites and portals based on:
 - Products and Services offered
 - Divisions / SBUs
 - Markets & Geographies
 - Distributors/ Resellers/ Franchises
- Miscellaneous entities (e.g. employees, teams, etc.)
- Brand Security/Protection from threats such as:
 - Phishing
 - Squatters

Communities

- Create a dedicated place for the community on the internet
- Promote the community and its purpose
- Ideal platform for out-reach initiatives
- Create dedicated portals for the community's sections, sub-communities, etc.
- Protect the community by regulating membership to the community TLD

“ LogicBoxes will be providing turnkey consultancy services for aspirants looking to apply for their own gTLD. ”

The LogicBoxes Advantage

LogicBoxes is the industry's premiere consultancy company with a decade's experience in serving Registrars and Registries. This enables our clients to leverage some unmatched benefits, giving their application a significant edge:

Industry's Premiere Consultancy Company:

Our core competence is accreditation consultancy. Over 15% of all existing ICANN Accredited Registrars have been consulted by us.

Specialized Resources:

Each application is backed by a specialized team of consultants that scrutinize each application on several parameters. The application then travels through a matured process which ensures the most efficient path to success.

Focus:

While most service providers only offer consultancy as an ancillary service, it forms a significant part of our revenue.

Registry Consulting Experience:

Over the years, we have had the opportunity to contribute towards the successful deregulation of the .in ccTLD, and lending marketing and technology counsel to the .mn and .coop registries.

Our Consultancy Services

LogicBoxes Consultancy services will provide aspiring gTLD applicants with complete end-to-end services in the following areas:

- 1 Conducting a 360 feasibility of the new gTLD initiative
- 2 Creating the ICANN application
- 3 Collating necessary documentation, approvals, etc. required to make a compelling case
- 4 Submitting the application and complying all related formalities
- 5 Consulting and managing the application through the subsequent ICANN approval rounds
- 6 Setting up the TLD on the LogicBoxes Registry Automation Platform
- 7 Operating, Maintaining & Supporting the TLD

Visit <http://gTLD.logicboxes.com> to schedule a FREE feasibility discussion of your gTLD application

- 配られているパンフレットを見ていると、誰でも自分専用TLDを申請できるように思えてくる

それは本当か？

新gTLDの目的

Recommendation 1 (Rec 1)

“ICANN must implement a process that allows the introduction of new top-level domains. The evaluation and selection procedure for new gTLD registries should respect the principles of fairness, transparency and non-discrimination.

All applicants for a new gTLD registry should therefore be evaluated against transparent and predictable criteria, fully available to the applicants prior to the initiation of the process. Normally, therefore, no subsequent additional selection criteria should be used in the selection process.”

(GNSO 最終報告書)

“registry”のための申請

新gTLDの目的(続)

1.2.1 Eligibility

Any established corporation, organization, or institution in good standing may apply for a new gTLD. Applications from individuals or sole proprietorships will not be considered.

(Draft Application Guidebook)

すなわち、gTLDはレジストリビジネスを行うために新設される(少なくとも建前は)。

実際、gTLDには「レジストリーレジストラモデル」が義務化されるので、一企業による「専有」は困難なはず。

建前に対する抜け道

(Draft Application Guidebookより抜粋)

1.2.2 Two Application Types: Open or Community-Based

All applicants are required to designate each application for a new gTLD as **open** or **community-based**.

1.2.2.1 Definitions

(open gTLDの定義:略)

For purposes of this RFP, a **community-based gTLD** is a gTLD that is operated for the benefit of a defined community consisting of a restricted population. (以下略)

このCommunity gTLDが抜け道となる可能性があるように見える

Proprietary TLD, Vanity TLD

一個人や一企業によるTLDの専有は

- Proprietary TLD(私有財産的TLD: 2007年10/11月のロスアンゼルス会合で丸山が使用)
- Vanity TLD(虚栄心的TLD: 2008年2月のニューデリー会合でDennis Jenningsが使用)

などの名前と呼ばれる。これに対する反発は強いが、明示的なポリシー決定はされていない。

既存事業者の思惑

- gTLDレジストリを既に行っている事業者は、設備投資(特にDNSサーバー)の効率運用のために、新規参入者に設備を有償提供したい。また、経験を生かして、申請書の代書を商売の種にしたいと考えている。
- 商標管理を売り物にしている法律事務所は、大企業の危機意識を煽って、申請書の代書を商売にしたいと考えている。

ように、丸山には感じられる(「煽る」側の人達は商売の利益に影響するので、TLD専有懸念の議論に応じたくない)。

今後の展開

- 12月15日まで、Draft Application Guidebook(RFP) に対する意見募集中
 - 宛先: gtld-guide@icann.org
 - <http://forum.icann.org/lists/gtld-guide/index.html> にアーカイブあり
- 今後の議論で「抜け道」はふさがれるか？
- 大量の「独自TLD」申請が出るのか？
- そのうちいくつかは通ってしまうのか？

今後の展開に注目したい
